

DIMIC Versatile Mini Shooting Table

NEW!

FOBA[®]
STUDIO-TECHNOLOGY

FOBA's mini shooting table DIMIC complements well the lower part of the product range. It is just as sturdy as the bigger models; it is as easily dismantled or mounted, has a mat surface, a colour-fast sheet and is basically shadowless. Thanks to its COMBITUBE* adaptors and other connecting elements, the table can be complemented and extended at will.

This table is especially adequate for small objects, even if they are heavy. The most comfortable way to perform shootings with it is to put it on a table. Thanks to its easy and fast dismantling it can be used only occasionally, when needed, and else stored in a very space-saving manner.

DIMIC mini shooting table

Width:	59 cm (23.2")
Length:	63 cm (24.8")
Height:	70.5 cm (27.8")
Height of the work surface from floor:	23.5 cm (9.3")
Flat work surface (Depth x Width):	30 x 45 cm (12"x18")
Upper surface of plate:	reflex free, mat
Thickness of plate DIMIA:	3 mm (0.12")
Translucence of plate:	ca. 50%
Load capacity, distributed load:	40 kg (88,2 lbs)
Weight:	7 kg (15,4 lbs)

Thanks to COMBITUBE, there is a limitless variety of possibilities for the mounting of:

- the object being shot
- diffusers and reflectors
- lamps
- the camera, if needed
- the legs.

The work space on the plate stays free and the one around the table doesn't get crammed.
