Dear Sinar Partner

Please be informed that Sinar CaptureFlow Studio 1.3.0 is ready for download.

Now available: Sinar CaptureFlow Studio 1.3.0
The Sinar Capture Software with constant color-management

New Functions & Features

- Preview mode to test exposure and composition of the motive
- Option to import custom Color-Checker reference files for Color-Calibration
- Enhanced performance of LiveView in Detail-Window
- Checkbox in Export-Dialog to decide if crop will be applied to exported file or not

Fixed Bugs

- Changes in Memory-Management of writing 16shot-files to enhance stability
- Images that have been trashed in 100%View are no longer visible after restart of software
- Modification in Shading-Calibration : Shading-Files have been analysed to be uniform and bright in former versions. Now specifications have been changed in order to provide more flexibility to work with Shading-Calibration.
- Minor bug-fixes
