MORE COLOURS.  
MORE VERSATILITY.  
MORE EFFICIENCY.

**Kodak** Professional Endura  
Premier Paper

Connect with Pro Quality

# INTRODUCING: KODAK'S BEST, COMMERCIAL, COLOUR NEGATIVE PAPER.

Professional photo lab commercial customers expect a wide variety of high-quality output products, especially photographic prints, to display an extraordinary colour gamut; done right and on time. That's exactly what you can do with KODAK PROFESSIONAL ENDURA Premier Paper. If you're running a mixed lab, portrait/social and commercial, this paper will help simplify your workflow and, at the same time, deliver amazing output quality that lasts.

As part of the award-winning KODAK PROFESSIONAL ENDURA Papers family, ENDURA Premier Paper raises the bar on how many vibrant colours you can expect from a commercial paper, because it will produce more colours than were possible with previous ENDURA Papers.

ENDURA Premier Paper features a technological breakthrough; the latest advancement in coupler technology, that addresses your lab's and your customers' needs to create high-quality output that meets the demands of commercial applications. Now, due to Kodak's innovative cyan dispersion and emulsion technology, you can benefit from an even larger colour gamut, while maintaining clean whites, rich blacks and accurate skin tones.

Kodak understands that your lab is constantly looking for options to differentiate your commercial work, to set itself apart from the competition, improve quality, grow business opportunities and meet its customers' high expectations. ENDURA Premier Paper provides the advantage you need, due to:

- Larger colour gamut for strong, bright colours, especially vibrant greens, blues, yellows and cyan
- Natural-looking skin tones
- Improved D-Min for cleaner-looking whites
- High D-Max capability for bold, rich blacks and better contrast\*
- Clean, sharp text and graphics for photo books, greeting cards and more

## **Drive and grow commercial sales with outstanding colour.**

The impressive colour accuracy of ENDURA Premier Paper enables you to faithfully reproduce the hues and tones of the original subject or scene. The result: high-colour-saturation prints that represent the original subject matter.

## **Attract customers with outstanding image stability.**

Customers want prints with a long life. ENDURA Premier Paper sets the standard for print longevity. Its tested light keeping is one to five years for commercial display.

## **Simplify your operation.**

A "single-paper" workflow that gives outstanding performance in both portrait/social and commercial or digital and optical printing equipment can greatly increase your lab's efficiency. Your ordering and inventory procedures will be much simpler when you don't have to stock separate papers.

## **Reduce remakes with greater print consistency.**

You'll see better matched prints between digital and optical printers, bright/rich colour saturation, pleasing tone scale and excellent skin-tone reproduction, as well as brighter greens, blues, yellows and cyan. ENDURA Premier Paper offers exceptional sharpness for type and graphics. Text reproduction is crisp, clean and precise. From studio portraits to outdoor candid, your customers get the matched prints they want.

## **Improve lab workflow and productivity.**

Excellent process robustness gives you the consistency you need with great first-time yield rates. ENDURA Premier Paper performs superbly with all formats of digital files and colour space and under varying exposures. It easily provides great results with Kodak's and other manufacturers' films - either optically or from scanned images.

For colour-charged output products that stand out from the crowd, with high quality, longevity and excellent durability, choose KODAK PROFESSIONAL ENDURA Premier Paper.

Features	Benefits
<i>Image Performance</i>	
Accurate skin tone reproduction	<ul style="list-style-type: none"> <li>• Ideal for portrait applications</li> <li>• Neutral tone scale - from highlights to shadows</li> </ul>
Maintains high D-Max capability *	<ul style="list-style-type: none"> <li>• Bold, rich blacks for superb contrast</li> </ul>
Increased colour gamut from Kodak's advanced colour dispersion technology	<ul style="list-style-type: none"> <li>• More colours</li> <li>• Strong, bright colours: especially vibrant greens, blues, yellows and cyan</li> </ul>
Improved D-Min	<ul style="list-style-type: none"> <li>• Lighter in density</li> <li>• Clean-looking whites</li> </ul>
Exceptional sharpness for type and graphics	<ul style="list-style-type: none"> <li>• Text/graphic reproduction is clean and sharp</li> </ul>
State-of-the-art image stability **	<ul style="list-style-type: none"> <li>• 100 years in typical home display, 200 years in dark storage</li> <li>• 20 months for high-intensity commercial reflection display under 5000 lux</li> </ul>
<i>Workflow Productivity</i>	
Improved latent image keeping	<ul style="list-style-type: none"> <li>• Increased stability for longer periods from exposure to processing</li> </ul>
Improved post-process finishing	<ul style="list-style-type: none"> <li>• Ideal for photo books, albums, wraps, cards, etc.</li> </ul>
Maintains robust and economical processing performance	<ul style="list-style-type: none"> <li>• Post-process mounting, stripping, etc.</li> <li>• Print consistency</li> <li>• Easy to calibrate workflow</li> <li>• Clean/reduced process maintenance</li> <li>• Low operating costs</li> <li>• Low environmental impact</li> </ul>
Maintains exceptional high-intensity reciprocity characteristics	<ul style="list-style-type: none"> <li>• For digital (CRT, LED and laser) and optical exposing devices</li> </ul>

\*Results vary by printer type and manufacturer.

\*\*Based on product application including specific light levels and temperature conditions.

KODAK PROFESSIONAL ENDURA Premier Paper is designed for processing in standard KODAK EKTACOLOR Chemicals for Process RA-4.

ICC output profiles, calibration routines and printer aims are available at [www.kodak.com/go/premier](http://www.kodak.com/go/premier). To further optimise results on your system, Kodak's Pro Lab Resource Center offers a customised profiling service for pro labs at [www.kodak.com/go/prolabrc](http://www.kodak.com/go/prolabrc). (Available in certain countries only - please contact your distributor for KODAK PROFESSIONAL Products.)

#### Availability

This paper is offered in either Glossy (F) or Matte (N) surfaces in roll formats, without backprint - the popular choice for commercial applications. Surfaces, formats and catalogue numbers may differ from country to country. See your supplier of KODAK PROFESSIONAL Products.
